Shoehorn

noppo

To store on a door.

- A return and refreshed design for our 20th anniversary.
- The shoe horn will magnetise to a steel wall or door. It also has a flat edge so it can be stored vertically. We want you to find this product where you placed it!
- A long shoe horn means you can put on your shoes in comfort without bending.
- Our modern design doesn't look like a shoe horn and is available in elegant European colours to suit your environment.
