Wet tissue storage container - New larger format!

How to use

- 1.Remove the wooden lid. While firmly grasping both the top and bottom components, gently squeeze and pull the top off.
- 2.Bend the tissue pack into an upside down U shape so it fits into the bottom component.
- 3.Gently pull the first tissue sheet out and pass it through the opening of the top component.
*Compress the tissue pack to remove any excess air.
- 4.Use the dots to match the top and bottom components together.
- 5.Close the lid tightly after each use.

Bend the tissue pack into an upside down U shape so it fits into the bottom component.

Use the dots to match the top and bottom components together.

Wet Tissue Case

Mochi Moco

size : W135 / D135 / H135mm

weight : 570g

material : white : Rubberwood(stopper), Silicone(lid), Melamine resin(jar)
