DESIGN.

ideaco-web.com

A towel made from organic cotton and antimicrobial rayon yarn, ideal for everyday use. Made in the traditional towel-making region of Senshu, Osaka.

SEK-certified for its hygienic and antibacterial manufacturing process. The material is a blend of two yarns: rayon yarn "Clavion" made in Japan (recommended by the Japan Atopic Association), and an organic cotton native to India. Both are environmentally-friendly and hygienic. A selection of vibrant colors that will brighten your life.

Manufactured using the traditional Senshu "post-bleaching method", which produces exceptionally soft towels.

The mini face towel has a hanging loop
