A minimalist kitchen drainer that looks beautiful on your kitchen island.

Washing up draining racks are often big and bulky and not so aesthetically pleasing. We created this product with design in mind. Easy to use without compromising on design and function. The Sculpture series brings a sense of unity to your space by creating a sculptural landscape like a desert oasis on your kitchen counter. It can be stored away neatly when not in use, so you can use more counter space for cooking.

In addition to the bottomless utensil stand, dish rack, and draining mat, we now have two new additions: a bottle stand and a compact utensil stand.

We now have items that can be easily combined to suit your lifestyle and make everyday dish washing fun.

Handy compact bottle drying rack

You can drain and dry your everyday use stainless steel bottles and water bottles while keeping them well ventilated. On the second level, you can dry small items such as lids.
