The perfect teakwood effect

Teak is a tree that grows in Southeast Asia and known for its strong resistance to corrosion. A well-proportioned material used to build luxury cruise ship decks and furniture, teak wood is also popular for interior design. Much like oak and beech, it's a slow-growing tree that's become a precious and expensive commodity.

Printed with a realistic teakwood effect, the resulting finish looks comparable to real luxury wood. A perfect complement to any classic interior.

TUBELOR TEAKWOOD

Cotton Trash

size : W225 / D95 / H150mm
weight : 400g ※ 1.7 ℓ
material : ABS(cover),polypropylene(body)
unit : IC 8 / MC 16

mini TUBELOR

size : W125 / D125 / H185mm
weight : 260g ※ 1.2 ℓ
material : ABS(cover),polypropylene(body)
unit : IC 4 / MC 16

HOMME

size : W260 / D260 / H315mm
weight : 1.1kg ※ 11.4 ℓ
material : polypropylene
unit : 4

Hi-GRANDE

size : W350 / D165 / H320mm
weight : 1.5kg ※ 11.5 ℓ
